DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a cassette positioner, classified in class 378, subclass 177.
 - II. Claims 5,6, 10-13 and 18-20 drawn to an upright restraint fastening mechanism, classified in class 292, subclass 2.
 - III. Claims 7-9, drawn to an adjustable plate mechanism, classified in class 411, subclass 190.
 - IV. Claims 14-15, drawn to turntable latch mechanism, classified in class 70, subclass 57.
 - V. Claim 21, drawn to child positioning apparatus, classified in class 378, subclass 167.
2. Inventions I, II, III, IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a positioning apparatus can comprise fastening means as documented in the prior art of record (U.S. Patents 3,051,832 and 5,600,702). The subcombination has separate utility such as improved fastening means.

Art Unit: 2882

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
